DETAILED ACTION

Response to Arguments

- 1. Applicant's arguments filed 4/13/2005 4, with respect to the rejection(s) of claim(s) 1-10,13,19,20,25,26 and 31under 103 (a) and filed 4/16/200 with respect to the Funahashi reference have been fully considered and are persuasive. Therefore, the rejection has been withdrawn.
- 2. Claims 11-12,15-18,21-24,27-30 have been cancelled.

Claim Rejections - 35 USC § 112

- 3. The following is a quotation of the first paragraph of 35 U.S.C. 112:
 - The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.
- 4. Claims 1-10,13,19,20,25,26 and 31 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Claims 1 and 31 recite "wherein said backside portion of said baffle is provided with a reinforcement rib disposed inside of said first closed chamber". The specification discloses in some embodiments that the front baffle is provided with heat dissipation slits page 9, lines 21-26) and discloses a semi-circle or arc-shape holder (60,Fgiure 6). The examiner did not

see any disclosure of the above recited reinforcement rib provided for the backside of the baffle.

The following is a quotation of the first paragraph of 35 U.S.C. 112: 5.

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claim 2 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with 6. the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.. Claim 2 recites an auxiliary baffle disposed between said baffle and said passive radiator unit, wherein said first closed chamber is formed by said speaker unit, said passive radiator unit, said baffle and said auxiliary baffle. This teaches away from the applicant's invention which discloses a speaker apparatus that does not need an auxiliary baffle like that shown in Figure 22 which shows a prior art speaker system.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

EP 0 800 330 A2 to Funahashi et al. discloses a loudspeaker system and sound producing apparatus.

Application/Control Number: 09/537,863

Art Unit: 2644

GB 2 260 464 A to Hoblesberger discloses loudspeaker providing improved bass reproduction.

GB 2 226 214 A to Gadea discloses a loudspeaker enclosure.

US 4,924,963 to Polk discloses compact and efficient sub-woofer system and method for installation in structural partitions.
